2. The Classical Artist Album Chart will be compiled from sales of full, mid-price and budget classical albums through all stores on the Official Chart Panel.

4. The eligibility for the Classical Artist Album Chart will be judged on the works included on the album, not on the artists involved in performance.
5. The works on the album should generally be capable of live performance in a concert setting
6. The works should be composed by recognised classical composers and/or in a publicly recognised classical idiom or form.
7. Arrangements of classical works which are not true to the original version may not be eligible for the Chart
8. If an album contains a mixture of classical and non classical works, a 60/40 rule will be applied. That is, at least 60% of the playing time must be of works regarded as classical according to the above criteria.
9. Original soundtracks and scores performed in a classical style, by either a single artist or various artists, will not be eligible for the Classical Artist Album Chart.*

Notes

- I. The Official Charts Company may refer albums to the Classical Advisory Panel for a decision on eligibility in the following circumstances:
 - Recordings of new works by living composers who are not known to The Official Charts Company or whose previous work has not been recognised as eligible for inclusion in the classical chart.
 - Recordings of works by composers whose output is known to cross between classical and other genres
 - Other albums which cannot easily be judged on the above criteria
- II These rules will be kept under regular review by The Official Charts Company.
- III The Official Charts Company reserves the right to amend these eligibility criteria in response to industry practices and movements in the market.
- IV Albums eligible for this chart under the previous version of the rules, will remain eligible for the chart.
- V The Official UK Charts Company will consult as widely as possible within the industry before finalising such amendments.
